

ARE YOU READY FOR T LEVELS?

Brand-new **level 3 qualifications**, T Levels have been developed with the support of employers and are aimed primarily at **16-18-year-old learners** to equip them with the knowledge, skills and behaviours required to enter the world of work or continue their studies at a higher level.

How will they work?

Each T Level is equivalent to **3 A Levels**, with courses taking **2 years** to complete via in-classroom learning sessions and on-the-job experiences, including a work placement of up to 50 days. T Levels include a technical qualification, as well as English, maths and digital content.

What subjects will be available?

T Levels will be available in numerous technical routes, most of which are already **supported by Highfield** through **regulated qualifications**.

Some technical routes will be delivered through apprenticeships:
